Office Action Summary	Application No. 10/075,000	Applicant(s) YAMAMOTO ET AL.	
	Examiner Matthew J. Sked	Art Unit 2626	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's arguments, filed 4/19/06, with respect to the rejection(s) of claim(s) 18 under 35 USC 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Hoory et al., cited in the previous Office Action.
2. Claims 1-17 and 19 have been canceled.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 18 is rejected under 35 U.S.C. 102(e) as being anticipated by Hoory et al. (U.S. Pat. 6,785,649).

Hoory teaches an information transmission method, comprising:

a first information processing process comprising the steps of capturing input speech information, changing the input speech information to character data, and sending the character data to a network (receives speech via the microphone,

Art Unit: 2626

generates text corresponding to the speech and transmits the text over to a network, col. 5, lines 29-56); and

a second information processing process comprising the steps of receiving the character data via the network, generating second speech information from the received character data, outputting the received character data, and using the second speech information to output speech (decodes and outputs the text as well as converts the text to speech using a speech synthesizer, col. 5, lines 40-56 and col. 9, line 58 to col. 10, line 7).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ittycheriah et al. (U.S. Pat. 6,119,086) and van Kommer (U.S. Pat. 6,678,659) teach converting speech to character data, transmitting the character data over a network and then synthesizing the character data at the receiver for output.
